- 2. Set action visually - no code needed.***

- ✓ No scripting.*
- ✓ No developers required.*
- ✓ Lower production cost.*

***Interactivity becomes accessible to everyone!***

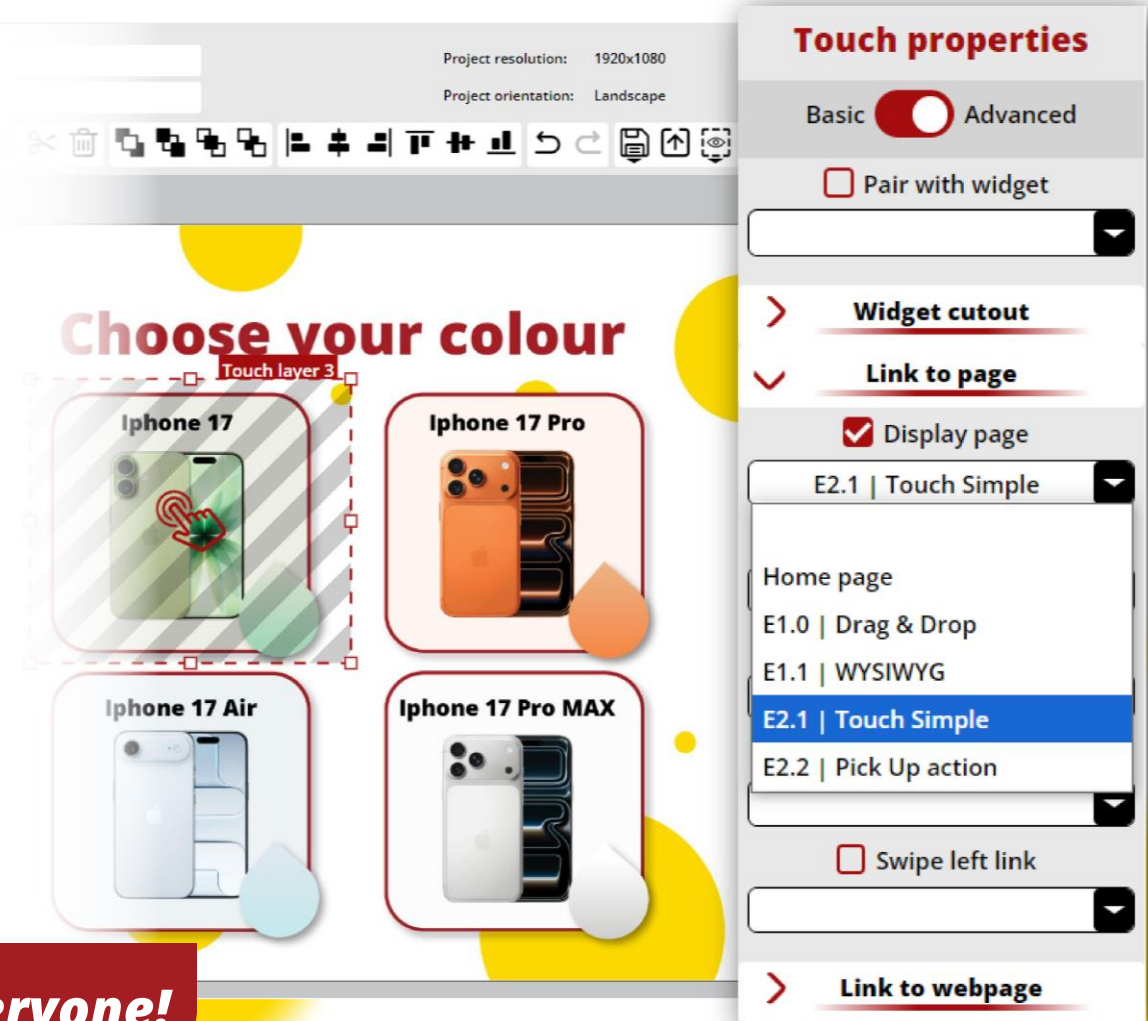

# Touch Screen projects Made Easy

*No Script. No Code. Just Logic.*

Choose the target **page**  
**visually from dropdown**

## Set Action:

- ✓ **Link to Page**
- ✓ **Swipe** (up/down/right/left)
- ✓ **Link to Webpage**
- ✓ **Pop-Up** image/video/text

The screenshot displays the LAKIOO software interface. At the top, it shows 'Project resolution: 1920x1080' and 'Project orientation: Landscape'. Below this is a toolbar with various icons for editing. The main workspace shows a design titled 'Choose your colour' with four iPhone models: 'Iphone 17', 'Iphone 17 Pro', 'Iphone 17 Air', and 'Iphone 17 Pro MAX'. A red dashed box labeled 'Touch layer 3' is overlaid on the 'Iphone 17' image, with a red hand icon indicating a touch action. To the right, the 'Touch properties' panel is open, showing 'Basic' and 'Advanced' tabs. The 'Basic' tab is active, and the 'Link to page' option is checked. A dropdown menu is open, showing a list of pages: 'Home page', 'E1.0 | Drag & Drop', 'E1.1 | WYSIWYG', 'E2.1 | Touch Simple' (highlighted in blue), and 'E2.2 | Pick Up action'. Other options include 'Pair with widget', 'Widget cutout', 'Display page', 'Swipe left link', and 'Link to webpage'.

**Interactivity becomes accessible to everyone!**

# Nexmosphere Sensor integration

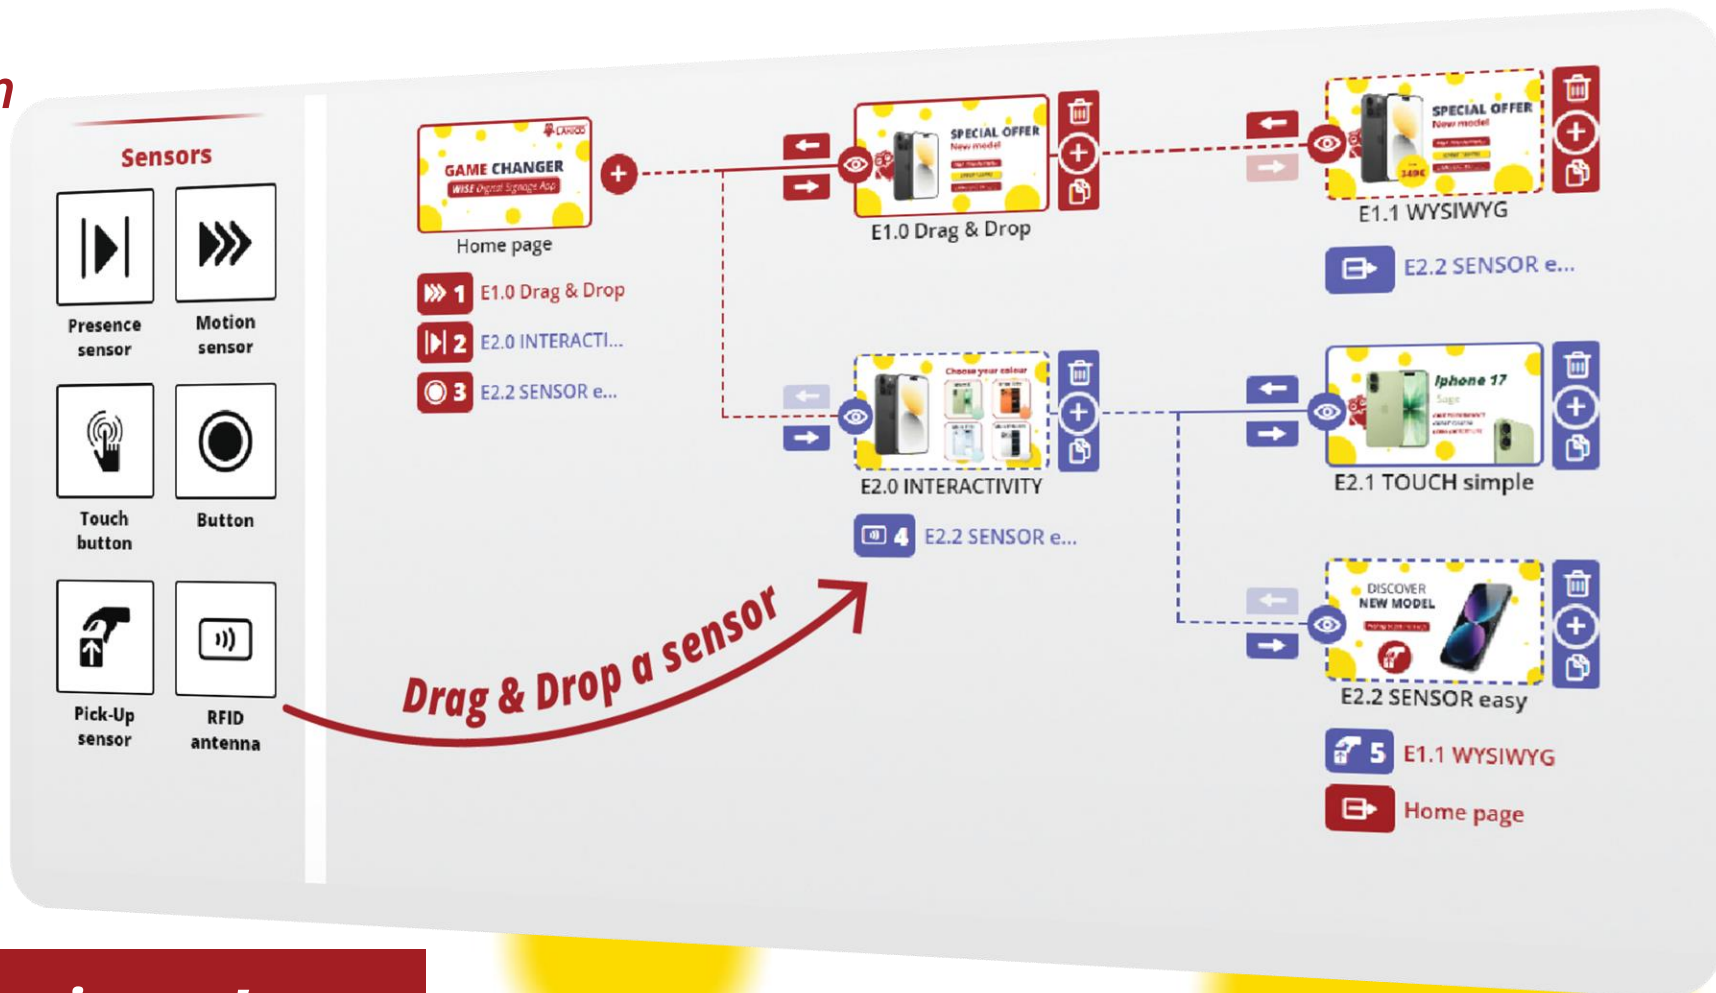

*Sensor-based experiences Made Simple*

*Create immersive installation without programming:*

1. **Drag & Drop** sensor into the project.
